

Divya Tyagi

Male, 18

EDUCATIONAL QUALIFICATION		
BTech CSE	Vellore Institute of Technology(vellore)	CGPA 8
Class 12 th (CBSE)	Khyati World School(Ahmedabad)	75%
Class 10 th (CBSE)	Srs. Gnayan Dham(vapi)	93%
COURSES		
Google UX Design Professional Certificate <i>Coursera</i>	- Completed a rigorous seven-course curriculum covering the end-to-end UX design process: Empathize, Define, Ideate, Prototype, and Test. - Designed three comprehensive projects: a mobile app, a responsive website, and a cross-platform experience. - Key Skills: User Research, Wireframing, Low and High-Fidelity Prototyping, Usability Studies, Accessibility, and Design Systems (Figma/Adobe XD).	
ACADEMIC ACHIEVEMENTS		
International Ranks: Attained an International 9th Rank in the SOF International English Olympiad. Full-Stack Competency & Local Inference: Engineered diverse programmatic solutions ranging from data utilities (local markdown/vault environments and notes engines) to local Large Language Model (LLM) orchestration frameworks, utilizing native scripting languages (Python, JavaScript) and core web technologies (HTML/CSS).		
INTERSHIPS		
Valscotech <i>UI/UX Design Intern</i> [may,2026] – Present	- Designing intuitive, user-centric wireframes, user flows, and high-fidelity interactive prototypes for web and mobile applications. - Collaborating with cross-functional teams and developers to ensure design consistency, technical feasibility, and seamless implementation. - Creating and maintaining scalable design systems, components, and visual assets to streamline the product development lifecycle.	
PROJECTS		
Rogue-like Dungeon Crawler (Python)	- Built a terminal-based roguelike RPG with procedural level generation to deliver unique replayable sessions each run. - Implemented an Entity-Component-System (ECS)-inspired architecture to modularize player stats, enemy AI, and item interactions, reducing coupling and easing feature additions. - Managed game state and field-of-view (FOV) computations using the tcod library, optimizing grid rendering for smooth runtime performance.	
AI Interrogation Room(Python, LangChain, Ollama)	- Designed adversarial and collaborative agent prompts to simulate interrogation scenarios, improving realism and emergent dialogue behavior. - Integrated local Mistral 7B inference via langchain_ollama with streaming response handling to enable low-latency CLI interactions. - Built a custom context-tracking loop to preserve multi-turn narrative state, maintaining dialogue continuity and reducing prompt token overhead.	
Visual Design Portfolio Brutalist & Neo-Grunge Aesthetics(Adobe Photoshop)	- Curated a digital portfolio emphasizing Brutalist and Neo-Grunge aesthetics, producing high-contrast mixed-media compositions for musical artists and film projects. - Applied raw textures, distressed typography, and unconventional layouts to create distinct visual identities that increased engagement on social channels. - Established and maintained a consistent social media presence to showcase experimental work and grow audience reach.	
Swiss-Style Weather Interface(Figma)	- Designed a minimalist weather app UI grounded in Swiss/International Typographic Style, prioritizing clear visual hierarchy and objective data visualization. - Employed a modular grid system and sans-serif typography to maximize legibility and accessibility across device widths. - Produced high-fidelity Figma prototypes with Smart Animate transitions to demonstrate smooth hourly-to-daily forecast navigation for user testing.	
Neuralis – Interactive OS Simulation & Interface game(Figma)	- Architected a multi-screen OS simulation (“Archivist” terminal) with immersive narrative-driven interactions and multi-monitor workflows. - Engineered a complex state-machine prototype using Figma variables and conditional logic to manage power states, multi-monitor displays, and nested directory navigation. - Built a modular component library to synchronize UI changes across distinct workspace matrices, accelerating prototype iteration and design consistency.	
EXTRA-CURRICULAR ACTIVITIES		

School Events	• Competitive Debating (School Team): Represented the institution in multi-school debate tournaments, developing advanced skills in public speaking, real-time articulation, and structured argumentation. • Rebuttal & Strategy: Mastered the ability to think critically under pressure, actively listening to opposing arguments to form strategic, logical counter-points.
Skills	• Proficient in Figma, Adobe Photoshop, Adobe premiere pro, Affinity suite, Python, Javascript, html and CSS, C and C++ programming language.
